What is myPerthHuron

It is an online resource to help track the well-being of our communities, where we are doing well, where community challenges may be emerging and discovering what makes our community unique.

Discovering the general well-being of individuals and society, is defined in terms of health and happiness, rather than simply wealth. In many respects, quality of life indicators representing well-being are subjective. What is considered to be 'good' varies from individual-to-individual and community-to-community. But with these tools we will be able to discover the values in these indicators.

Indicators

Indicator Selection

The base list of indicators have been based off the 2014 Quality of life report.

Sources of Information

Data has been pull from a variety of sources and where ever possible data for both Perth and Huron Counties including the town of St.Marys and the city of Stafford being represented at the lower tier level.

Data Limitations

Each domain includes a brief description and graphic illustration of the indicator data (i.e. what it measures? Why it matters? What the latest data says?). Inferences and conclusions, however, have purposely not been drawn.

We'd like to hear from you.
