**RE: Township of North Huron
Water and Wastewater Servicing Master Plan Study**

The Township of North Huron is initiating a Water and Wastewater Servicing Master Plan study for the communities of Wingham and Blyth, to identify future infrastructure and servicing needs related to the municipal water and sewage systems over the next 20 years. The Water and Wastewater Servicing Master Plan process will involve a review of existing water treatment, storage, and supply infrastructure, and sanitary sewage collection and treatment infrastructure. The study will also include a review of growth projections used to establish potential future water and wastewater servicing requirements as they relate to key infrastructure. Upon completion, the Master Plan will serve as a strategic document for the continued provision of water and wastewater services. The Master Plan will also identify and outline the implementation of any recommended projects.

The Water and Wastewater Servicing Master Plan is being conducted in accordance with the requirements of the Municipal Class Environmental Assessment (Class EA) which is an approved process under the Environmental Assessment Act. Master Plan studies incorporate Phases 1 & 2 of the Class EA process and also include consultation with the general public, government review agencies, First Nation and Métis communities, and the general public.

Your organization has been identified as possibly having an interest in this project and we are soliciting your input. Please forward your response to our office by **December 13, 2017**. If you have any questions or require further information, please contact the undersigned at 1-888-524-2641 or by e-mail at lcourtney@bmross.net.

Yours very truly
