SCHEDULE "C" PROJECT

Project Title: Wingham and Area Flood Plain Mapping Update

<p>Objectives</p> <p>This project aims to update the flood mapping for the area of the former Town of Wingham, Lower Town and North Wingham areas (now located in North Huron and Morris-Turnberry Townships) to .1 m contour detail so the municipalities can proceed with flood plain mapping.</p>
<p>Description</p> <p>This is a joint project of the Township of North Huron and the Municipality of Morris-Turnberry. Councils of both municipalities have reviewed and approved the completion of the Watershed Plan and updated flood mapping. A 2019 work plan required a digital elevation model to meet Provincial requirements which is part of this project. The updated flood mapping is important to complete prior to the Watershed Plan in order to better assess the flood risk and determine opportunities for mitigation in the area and throughout the watershed to further mitigate flood impacts to North Huron and Morris-Turnberry. Once up to date flood plain mapping is available, both Municipalities and the Conservation Authority can work cooperatively to identify a practical and rational strategy to target appropriate mitigation techniques that will reduce flooding potential and/or the impacts of flooding.</p> <p>The project to update the flood mapping for the Wingham, North Wingham and Lower Town areas (located in North Huron and Morris-Turnberry) is important as there have been many changes to the communities since the flood mapping was updated in 1976. The updated flood line mapping project has taken on greater necessity since June 23, 2017 when the North Maitland River experienced a 1:100 flood event as a result of an extreme rainfall event. The Conservation Authority is currently looking at the data from the flood event on June 23 as there is some thought the flooding may have been more severe than a 1:100 year event. In addition, the river and overland flow did not react in all areas as anticipated by the modeling and forecasting. This project will assist the Conservation Authority and in particularly the Municipality of North Huron when looking at ways to mitigate, prepare, response and recover for future events.</p>
<p>Expected Outcomes</p> <p>Reducing impacts of disasters on Canadians:</p> <ul style="list-style-type: none"> - Create more detailed, accurate, up-to-date flood mapping showing the areas impacted including buildings, infrastructure, farmland, etc. - Provide North Huron, Morris-Turnberry and Maitland Valley Conservation Authority with data to undertake a mitigation analysis and determine appropriate measures (small scale) to reduce flood impacts particularly for the urban center of North Huron mainly affected during heavy flooding. - Increased mitigation measures will in turn reduce the impacts of flooding on Canadians living in North Huron and particularly in the Wingham area. <p>Reducing disaster-related financial liabilities for all levels of government:</p> <ul style="list-style-type: none"> - Better flood mapping will facilitate better decisions with respect to appropriate mitigation techniques to reduce flooding; - Less impacts from flooding on residents, business and infrastructure will reduce need for insurance claims if available; - Reduce costs to the Township of North Huron and Municipality of Morris Turnberry responding to and recovering from flood events; - Less cost to the Province to supplement/fund the Town and residents and businesses to cover unexpected expenses for essential living needs not covered by insurance through the Disaster Recovery Assistance for Ontarians and the Municipal Disaster Recovery Assistance programs. <p>Reducing risk, developing capacity and/or enhancing resilience:</p> <ul style="list-style-type: none"> - Provide more accurate information with respect to flood risk - Project data will be used to look at techniques/methods to reduce flood risk

- Will be used by the municipality and Conservation Authority to make better decisions with respect to mitigation and/or preparing for flood events including the need to build capacity
 - Municipality can provide good public education and information to residents, business, community at large as to how the extent of the mitigated risks which the community can use to mitigate/prepare their own properties to either reduce the impacts, prepare for an event, and be in a position to recover quickly from these events.
